

Date - 07/09/2024

Venue - Adurapola Estate

Participants - 35

Theme - Vision

Vision Care programme was also conducted during this Mega Project and 35 spectacles were distributed after a proper vision screening. Awareness programme was also conducted parallelly on Eye Care. This kind of programmes are not held in these areas as and when necessity arises.

Impact of the programme :-

It has been revealed that the rural population is highly negligent on eye care and especially area like Edurapola where this programme was implemented mainly due to unawareness and lack of accessibility.

Final result of this negligence could be blindness which can easily be avoided if detection is done early.

But unfortunately facilities for early detection programmes are very rare in those estate area. Therefore, this Lions programme was very useful for the villagers and estate population.

Through eye screening, eye defects were also identified and referred for cataract surgeries .

In some cases vision defects were identified and provided with spectacles. In this context 35 spectacles were distributed.

This kind of programmes finally avoid total blindness for greater extend. As a result of this programme message of importance of eye care would be spread through out the area within a short period of time.

This will be a good motivation also for people to go to the nearest eye clinic quite regularly without waiting until it is too late.

Through this programme, in addition to the 35 direct beneficiaries another 500 people will also be benefited through word of mouth.
